

WOMEN'S LEADERSHIP LUNCHEON

2025

Sponsorship Opportunities

Alzheimer's disease impacts 1 in 9 adults aged 65 or older (Alzheimer's Association, 2024), a sobering statistic that demonstrates the likelihood of being affected by Alzheimer's personally or through a loved one's diagnosis. The Nun Study is a groundbreaking research study that aims to understand factors of the disease. The School Sisters of Notre Dame eagerly participated while living and postmortem to advance the prevention and treatment of Alzheimer's. It is our hope and prayer that someday we will not need to watch our loved ones suffer from the effects of Alzheimer's.

Transforming the world through education.

The 2025 Women's Leadership Luncheon, *The Nun Study: Transforming the Future of Alzheimer's Disease and Other Related Dementias*, seeks to provide attendees with education on the impact of the Nun Study, information about prevention, current treatment trends and hope for a better future. Dementia is debilitating for the person living with the condition. It is heartbreaking for loved ones to watch the suffering as the disease progresses. Alzheimer's and other related dementias create a devastating experience for all. Yet, memory loss only wins when we stop courageously fighting to find a cure and a better future.

Sponsorship of the 2025 Women's Leadership Luncheon demonstrates your support of those impacted by Alzheimer's and other related dementias. **Together, we can demonstrate our appreciation for the efforts of the scientific community and professionals working in the field of aging.** Through education and awareness of current trends, we can provide hope and support. When sponsoring the Women's Leadership Luncheon, your organization will receive recognition through event signage and the program booklet, SSND social media and website. You will also receive a reserved table at the event and opportunities to network with other sponsors and attendees. Our \$5,000 level donors will receive the opportunity to host a vendor table at the event. Sponsorships make a difference.

Our presenting sponsor, Ann Kampeter, believes the Women's Leadership Luncheon is a valuable event since educating and inspiring women leaders helps create a brighter future. Ann is passionate about our 2025 theme due to personally experiencing a loved one living with Alzheimer's. She believes in standing united against Alzheimer's and other related dementias until we finally find a cure.

The School Sisters of Notre Dame believe in the Dignity of Life. All human life is valued. Alzheimer's and other related dementias have the power to diminish the quality of one's life, but as the sisters who participated in the Nun Study demonstrated, those aging and impacted by dementias are worthy of a relentless search for a future with a cure.

We extend an invitation to you to stand in solidarity with us for those living with Alzheimer's and other related dementias. **As a sponsor of the event, you will help create hope for tomorrow.**

*You may not
remember,
but I will
never forget.*

WOMEN'S LEADERSHIP LUNCHEON 2025

March 20, 2025

SPEAKER: Dr. Sudha Seshadri, M.D., Director

*Glenn Biggs Institute for Alzheimer's and Neurodegenerative Diseases University of Texas Health Science Center, San Antonio
Professor of Neurology, Psychiatry and Cellular and Integrative Physiology, Joe R. and Teresa Lozano Long School of Medicine, San Antonio*

Professor Sudha Seshadri, M.D., is a behavioral neurologist and the Robert R. Barker Distinguished University Professor of Neurology, psychiatry and cellular and integrative physiology at the Joe R. and Teresa Lozano Long School

of Medicine, University of Texas Health Sciences Center, San Antonio.

Since December 2017, she has served as the founding director of the Glenn Biggs Institute for Alzheimer's and Neurodegenerative Diseases which was awarded a National Institute on Aging designated Alzheimer Disease Research Center (ADRC), the South Texas ADRC in 2021.

The Biggs Institute combines comprehensive, compassionate, continuing clinical care for a broad range of vascular and neurodegenerative diseases with basic, computational and epidemiological research, community outreach, advocacy, training and education with a special emphasis on bringing the most advanced precision prevention, diagnosis and treatment approaches to the underserved Hispanic communities in south Texas.

Dr. Seshadri completed her medical education and residency training in internal medicine and neurology at the Christian Medical College, Vellore, India, the Madras

Medical College, Chennai, India, and at the All India Institute of Medical Sciences in New Delhi. She later completed a second residency at Boston University, Boston, along with fellowship training in the neurobiology of aging and in neuroepidemiology at the University of Massachusetts Medical Center in Worcester, Massachusetts, and the National Heart, Lung and Blood Institute's Framingham Heart Study, Bethesda, Maryland, where she remains a senior investigator, with an adjunct appointment as professor of neurology at Boston University, Boston.

Her research interests are in uncovering the biology of Alzheimer's disease and related dementias, stroke and vascular brain injury through epidemiological, genetic, multi-omic and biomarker studies on large, population-based cohorts. In parallel, she continues to see patients and lead clinical trials of promising therapies. She has received over \$95 million in grant funding from the National Institutes of Health, has over 500 peer-reviewed publications, has mentored over 45 physicians and scientists and won awards as a teacher, clinician and researcher, including election to Alpha Omega Alpha and the Association of American Physicians. She has lectured extensively, nationally and internationally and leads several national and international consortia. She is a recognized thought leader in Alzheimer's disease and has been featured over 150 times in the lay media. Her goal is to leave a legacy of effective preventive or therapeutic interventions for dementia, and a cadre of dedicated and caring clinicians and scientists whom she has helped empower.
